# Janus

Janus, the lightest and most compact crimp tool of its type, has a rotatable die set so that the ferrule can be inserted into the front or side of the tool to suit cabinet and bench working respectively. The tool is self-adjusting to produce a trapezoid shaped crimp profile on wire ferrules 0.14–10.0 mm<sup>2</sup>/AWG 26–8 (produced to DIN 46228-parts 1 and 4 or UL 486F).

Perfil de crimpado

- Rotatable die set at the push of a button
- Self-adjusting die nest for 0.14–10.0 mm<sup>2</sup>/AWG 26–8 ferrules
- Trapezoid shaped crimp profile
- Compact design for easy access into constricted spaces
- Ergonomic handles and low handle force for low effort crimping
- Lightweight and well balanced
- Small handle opening angle
- Ratchet control (with emergency release) to ensure completion of crimp cycle
- Non-slip grip pad for applying pressure against a surface
- Hole in handle allows attachment of safety strap
- Each tool has a unique
